THE ROADMAP

Seven steps. One clear journey.

Every project is different. We confirm the sequence, scope and timing with you before work begins.

01 **Discover & understand**

We start with a conversation about your business, audience and idea. We listen carefully and identify the problem your digital project should solve.

Your goals and audience • Current challenges and opportunities • Must-have features and priorities

WHAT YOU CAN EXPECT: A shared understanding of the project

02 **Plan & agree**

We turn the discussion into a clear plan before development begins. You can review the scope and understand what is included.

Project scope and deliverables • Suggested timeline and milestones • Budget estimate and approval

WHAT YOU CAN EXPECT: An agreed project plan

03 **Design the experience**

We map the pages and user journey, then shape a clean and easy-to-use interface that reflects your brand.

Page structure and navigation • Visual direction and responsive layouts • Design review and feedback

WHAT YOU CAN EXPECT: A design direction ready for development

04 **Build the solution**

We develop the approved website or application using technologies that fit the requirements—not technology for its own sake.

Frontend and backend development as needed • Content and feature integration • Progress updates and review checkpoints

WHAT YOU CAN EXPECT: A working project preview

05 **Test & refine**

Before launch, we check important user journeys and improve issues found during testing.

Mobile and desktop checks • Forms, links and key functionality • Corrections and final review

WHAT YOU CAN EXPECT: A launch-ready solution

06 **Launch & hand over**

We help publish the approved project and explain the essentials so you know how to use and manage what has been delivered.

Deployment and launch checks • Access and handover guidance • Final deliverables

WHAT YOU CAN EXPECT: Your project goes live

07 **Support & grow**

After launch, we can discuss maintenance, updates and future improvements based on your evolving needs.

Maintenance options • Feature enhancements • Next-phase planning

WHAT YOU CAN EXPECT: A path for continued improvement

TECHNOLOGIES

WORKING TOGETHER

What you can expect from us

We keep the process practical and collaborative, with clear communication at the important decision points.

- **Clear communication**
  You know who to contact and when to expect updates.
- **Agreed scope**
  Features, deliverables and assumptions are discussed before development.
- **Visible progress**
  We share reviews at agreed checkpoints so you can provide feedback.
- **Practical decisions**
  We recommend tools and features based on your needs and budget.
- **Thoughtful handover**
  We explain the delivered work and discuss useful next steps.

READY TO DISCUSS YOUR IDEA?

Let’s plan your project.

Tell us what you are trying to achieve. We can discuss the right next step, project scope and a suitable approach.
